IMPORTERS AND EXPORTERS

PRICE LIST NO. 16

<u>No.</u>	<u>Cross</u>	<u>Parentage</u>	<u>Sizes</u>
312	<u>C.TRIANAE</u> var."alba" (extra fine)	This is a home-raised C.Trianae alba. The seedlings are from a self pollinated pure alba C.Trianae. Only a faint touch of yellow, deep in the throat is visable. We hope that a large percent turn out to be "pure albas". Approximate time of flowering. Nov.to March	2" 2½" 3" 4" \$2.00
315	<u>C.TITRIANAE</u> (C.Tityus x C.Trianae var.Colloidal)	A very fine hybrid, flowering thru early spring when Orchid blooms, are scarce, and bring top prices. Very good for cut flower purposes. Dec.to June	1.00 2.00 3.50 5.00
316	<u>C.ALTADENA</u> (very fine) X <u>LC.BELLA</u> (very fine)	Two top grade hybrids creating what we believe will be a new cross of exceptional merit. Sept.to Nov.	1.50 2.50 4.00
320	<u>LC.HURON</u> (Lc.Schroederae x C.Trianae (very fine))	The Lc.Schroederae parent of this cross is the darkest we have seen. Seedlings of this cross will produce large dark type blooms. C.Trianae "Colossal" has flowers 8" across. Ideal commercial and exhibition plant. Jan.to March	2.00 3.00 4.50 6.00
321	<u>C.ALTADENA</u> X <u>C.TRIANAE</u> var."COLOSSAL"	Another large bloom is expected in this cross. The fine rich lavender tones in C.Altadena and large size of this C.Trianae will combine to make this cross very outstanding. Sept.to Dec.	1.00 2.00 3.50 5.00
330	<u>C.CLOTHO</u> (C.Trianae var."Grand Monarch" x C.Enid)	This is one of the best hybrids with this rich type of C.Trianae as a parent. Very deep lavender color and extremely free flowering. Various	2.00 3.00 4.50 6.00

Rapella Orchid Co.

No.	Cross	Parentage	Sizes
336	(#76-REMY CHOLLET X LC.MRS.HAROLD LLOYD)	X <u>C.DOWIANA</u> Without a doubt this will be an outstanding hybrid. Our #76 cross, as yet unnamed, is in the process of being registered. It is a very strong growing, free flowering hybrid. Sept. to Dec.	2" 2½" 3" 4" \$1.50 \$2.50 \$4.00
337	(#76-C.REMY CHOLLET X LC.MRS.HAROLD LLOYD)	X <u>C.TRIANAE</u> var."COLOSSAL" A combination of two outstanding parent plants. The blooms, their prodige are expected to produce, will rate among the choicest, for size and richness of color. Nov. to March	2.00 3.00 4.50 6.00
344	<u>C.TRIMOS</u> (C.Trianae var."Colossal") X C.Mossiae var."Colossal") Another fine commercial cross. The parents used have blooms almost 8" across. Very rich in color and free flowering. This cross is indispensable for cut flower purposes. Dec. to March		1.00 2.00 3.50 5.00
345	<u>C.HEATHERWOOD</u> (C.Mossiae var."Countess Grey") X C.Tityus (very fine) Spring and early summer bloomer. One of the finest for cut flower purposes. Flowers are large and very rich in color. This cross is well known. March to June		1.00 2.00 3.50 5.00
347	<u>C.DUBIOSA</u> (C.Harrisonii var."alba") X C.Trianae var."alba"(extra fine) This is one of the most vigorous growing plants we know of. From a commercial standpoint this is an ideal cross. The free flowering habit of C.Harrisonii "alba" crossed with our C.Trianae "pure alba" is expected to produce an outstanding alba cross. A perfect cut flower variety. Oct. to Dec.		2.00 3.00 4.50 6.00
349	<u>C.ALTADENA</u> (very fine) X <u>C.MOSSIAE</u> (very fine) In this new hybrid, we look for a very free flowering strain of unusual quality and great commercial value. Jan. to April		1.00 2.00 3.50

Rapella Orchid Co.

<u>No.</u>	<u>Cross</u>	<u>Parentage</u>	<u>Sizes</u>
356	<u>C.MOSSIAE (extra fine)</u> X	We used two identical C.Mossiae, unusually large and very rich, deep color thru the entire flower. The difference between a superior "home raised type" such as this, to the average jungle plant is tremendous. There is no comparison. Tops commercially.	2" 2½" 3" 4" \$1.00 \$2.00 \$3.50 \$5.00
	<u>C.MOSSIAE (extra fine)</u>		
358	<u>C.ARDMORE</u> (C.Enid x C.Mossiae var."Countess Grey")	Another very free flowering hybrid. Having the habit of C.Enid, its' season is variable. Blooms more than once a year. Very fine commercially.	1.00 2.00 3.50
359	<u>(LC.SCHROEDERAE (dark type)</u> X	C.MOSSIAE var."COUNTESS GREY") One of the darkest crosses in our collection of plants. As albas develop in both parents, we hope some show up in this cross. Stock very limited.	1.50 2.50 4.00 6.00 Feb.to April
363	<u>C.HIGHBURIENSIS (C.Harrisonii x C.Mossiae)</u> A novelty cross, made for our own use. As the blooms are expected to be of medium size (about 4" across), they are ideal to be used for hair bands. The habit of growth favors C.Harrisonii, so we can expect the stems to carry clusters of many perfect blooms. The parent C.Harrisonii, in 5" pot had 3 dozen flowers on several stems, all open at one time. Very showy. Fast growing plant. Excellent for cut flower purposes or as a show plant.		1.00 2.00 3.50 5.00 May to Aug.
368	<u>LC.BELLA X C.PATRICIA REEVES</u> We like the type blooms both parents have, heavy textured bold flowers, of excellent color on vigorous growing plants. Seedlings show same habit of growth.		1.50 2.50 4.00 Sept.to Dec.
378	<u>C.PRINCE SHIMADZU X C.HESPERUS</u> Two very fine hybrids. This cross, without a doubt, will produce very rich colored flowers. Its' season of blooming will be thru the Christmas and New Years holidays. Very opportune.		1.50 2.50 4.00

Rapella Orchid Co.

<u>No.</u>	<u>Cross</u>	<u>Parentage</u>	<u>Sizes</u>
381	<u>LC.ASBURY</u>	X (#72-LC.SARGON var."W'brt" X C.TRIANAE var."Imperator") This we believe is our finest new hybrid. The seedlings from this cross will produce some of the richest colored hybrids in cultivation. Its' flowering season is from Oct.to Jan., when extra fine hybrids are in great demand.	2" 2½" 3" 4" \$2.50 \$3.50 \$5.00
385	<u>C.HARDYANA X C.PRINCE SHIMADZU</u>	We look for this cross to be a summer bloomer. C.Hardyana is too well known for comment. Crossed with C.Prince Shimadzu, the richness in color of both should combine to produce exquisite blooms.	1.50 2.50 4.00
		June to Sept.	
386	<u>C.CANADA X C.PRINCE SHIMADZU</u>	Again we have combined two outstanding parents to create anew and richer hybrid. Very fine commercially.	1.50 2.50 4.00
		May to July	
411	<u>LC.SANTA CLAUS X C.FALCO</u>	This is the hybridists dream of perfection. Our C.Falco is so dark that it is almost black. The bloom is perfectly formed, full, and of heavy structure. The Lc.Santa Claus parent tho not quite as deep in color is equally as beautiful. An outstanding new hybrid. Stock is limited.	2.00 3.00
		Fall thru Christmas	
413	<u>C.LABIATA (very fine) X LC.HILARY (extra fine)</u>	Another new hybrid of great promise. The rich tones of Lc.Hilary combined with the excellent qualities of C.Labiata, are sure to appear in this fine cross.	1.50 2.50
		Nov.to Jan.	
439	<u>C.FABIA X C.ANDROMAQUE (Both extra fine)</u>	Our C.Fabia is of the finest strain obtainable. C.Andromaque is equally as grand. Two free flowering parents combined to produce a blooming plant of unusual merit.	2.00
		Sept.to Oct.	
440	<u>C.FABIA (extra fine) SELF CROSSED</u>	We are recreating the finest C.Fabia we know of. All our customers agree to the merits of this parent plant. It makes us proud to have a critical clientel put their stamp of approval on this hybrid. Flowers twice a year.	2.00
